

## Range of expertise drives Atkins forward

Atkins is a multidisciplinary organisation that is committed to sustainable design. The simplest articulation of what it does is 'plan, design and enable'. Atkins positions itself as a leader in roads, engineering, architecture, water, environment (landscape, ecology and noise) quantity surveying, and traffic and transportation planning with a large number of private and public sector clients.

It is one of the world's leading engineering consultancies employing over 16,000 people worldwide. In Ireland, Atkins employs more than 150 staff, with offices in Dublin, Cork, Galway and Belfast. According to a spokesperson for the organisation: "We have the depth and breadth of expertise to respond to the most technically challenging and time-critical infrastructure projects."

With an extensive local client base, Atkins has had an office in Cork since 1978 and has delivered numerous high profile projects there in recent years including: the Cork Area Strategic Plan, the N8 Watergrasshill Bypass, Cork Greyhound Stadium and the Mahon Point Development.

Atkins is currently working on a wide range of important projects in the Cork area including: the Ballincollig Green Route, the Kanturk Relief Road, the Youghal Main Drainage and Wastewater Treatment Plant, St Raphael's and Seaview Mental Health Centre in Youghal, Cork Science Park and Cork County Council Habitat Mapping.
