

Senior Ecologist

Location :	Cork / Dublin, Ireland
Salary:	Negotiable
Minimum Education Requirement:	An appropriate 3rd level academic qualification
Type of Position:	Permanent full-time position

Senior Ecologist

Atkins is looking to appoint a Senior Ecologist based within the Environmental team. The successful applicant will be working as an integral member of the ecology team, delivering the highest standards of technical work and aiding the continued expansion of the ecology business; while also working closely with fellow professionals within Atkins. The work will be diverse and involve all aspects of ecological consultancy with a primary focus on undertaking habitat / botanical and invasive species surveys. The successful applicant will also work closely with other streams within the business on a range of infrastructure and water projects. They will also be required to input into the preparation of proposal and tender documents.

Job summary and desirable skills/attributes

The successful applicant should be a member of the Chartered Institute of Ecology and Environmental Management. They should have: -

- An appropriate 3rd level academic qualification in a related discipline;
- Demonstrable experience in the area of Phase 1 habitat surveys and botanical surveys;
- Experience of producing and reviewing ecology chapters as part of EclA for complex projects;
- Appropriate Assessment experience;
- Up to date knowledge of EU and Irish wildlife legislation and policy;
- Have experience in ecological consultancy having already developed their core field and reporting skills;
- An ability to provide support and mentoring to junior members of the team;
- Capable of organising and developing your work with minimal supervision;
- Hold a full current Irish driving license and be comfortable in working in remote locations;
- They will have excellent report writing skills with a focus on quality and attention to detail;
- Experience of riparian ecology, mammal, birds and / or invasive species also useful;
- GIS experience (preferably with MapInfo or QGIS)
